

## TECHNICAL DATA SHEET

**TZB-TURF**

**LIQUID ORGANIC TURF STIMULANT.**

### CONTAINS HIGH CONCENTRATION OF ENZYMES AND MICRONUTRIENTS

- Increases microbial activity;
- Suppresses disease;
- Enhances root formation;
- Promotes plant nutrients;
- Deactivates toxic impurities and chemicals;
- Treats and strengthens damaged lawn.

### SPECIFICATIONS

Description	Liquid
Packaging	20L, 205L
Stability	Max. loss of 1 log/yr
pH	4.5
Nutrient Content	Biological nutrients and stimulants
Storage and Handling	DO NOT FREEZE! Store in a cool dry location.

## GUARANTEED MINIMUM ANALYSIS

Total Nitrogen (N)	1.00%
Phosphorus (P205)	0.10%
Potassium (K20)	1.00%
Calcium (Ca)	3.00%
Magnesium (Mg)	0.50%
Sulphur (S)	2.30%
Iron (Fe)	0.75%
Boron (B)	0.02%

## APPLICATION INSTRUCTIONS

To obtain a ready-to-use concentration of the product, dilute 1 liter of TZB-TURF into 200 liters of water.

**Mixing Directions** - Fill container with half the recommended quantity of water, then add TZB-TURF and agitate. Add the remaining water. After all the water has been added, thoroughly agitate or stir mixture before application. Continued agitation is not necessary. Solution should be used within 24 hours. After 24 hours, solution may lose some effectiveness.

**Application Directions** - Apply TZB-TURF using conventional equipment as garden hose or sprayer to the point of saturation. Apply at a rate of at least 100 gallons per acre. TZB-TURF can be incorporated into nutrient solutions for hydroponic plants and vegetables, as well a seed soak or dip. Early treatment prevents lawn diseases from developing. Deactivates toxic impurities and chemicals. Repairs burned and damaged lawn. When spraying use filter to reduce plugging of the nozzles.
