

TECHNICAL DATA SHEET

TZB-U4

URINAL TABLETS.

The BioTablets TZB-U4 are designed to provide immediate and effective odour control in urinals while inoculating the drain system with beneficial enzyme activity. The enzymes will degrade the organics that cause odours and backups.

Benefit of use:

- Cleaner and fresher environment in the restroom;
- Safer and healthier solution than offensive chemicals;
- Easier maintenance.

SPECIFICATIONS

Description	Blue tablet
Fragrance	Apple
Packaging	Box 113g: 12 x 4oz tablets
Salmonella	Negative
Bacteria Count	3.6×10^7 cfu/ml
Stability	Max. loss of 1 log/yr
Storage and Handling	DO NOT FREEZE! Store in a cool dry location. Avoid excessive skin contact. See MSDS.

Why the BioTablets TZB-U4 are replacing “Naptalene” urinal blocks.

IN CANADA, schools have already banned “para” blocks in their institutions. Research shows that the old “Para dichlorobenzene” or “naphthalene” urinal tablets could cause potential health hazards in humans who handle these products in regular basis. Soon patrons and custodial technicians will be forced to replace the potentially hazardous or dangerous chemical type urinal tablets that are currently being used.

The components of TZB-U4 are listed on the Canadian Domestic Substance list (DSL) and supported by the Environment Canada Program.
